

JAVA/SQL DEVELOPER

We want you! Your creative brilliance. Your positive attitude. Your commitment to delivering the best. And, if you happen to be good at ping pong...well, all the better!

ABOUT US:

Join Baudville, Inc. Under one big building is the trifecta of teamwork: Baudville, IDville, and hi5. Baudville is an industry leader in providing day-to-day recognition solutions and awards for schools and the workplace. IDville specializes in photo identification systems and accessories that promote the safety of employees, students, and staff. And, hi5, our newest brand to join the team, offers innovative service awards and performance-based recognition programs.

Together our three brands serve business, education, government, and healthcare markets while setting marketing trends and pioneering new products that make our competitors drool.

ABOUT THE OPPORTUNITY:

Our hi5 brand is looking for a Web Developer who has experience with Java technologies along with SQL, HTML, CSS, Javascript, and JQuery. Developer will ensure optimal performance of website with an emphasis on innovation and continuous improvement while providing reporting to upper management regarding the status of projects. If you meet the qualifications, enjoy a challenge and would like to work in a fun work environment, please submit your resume today.

JOB DUTIES:

- Uploads data into SQL for hi5 data load, printing marketing merchandise, etc.
- Communicates with customers directly regarding employee data file issues.
- Serve as a liaison between internal people and external contractors who provide services for the web sites.
- Maintain the existing code base.
- Create and update web pages and content using Java, HTML, CSS, Javascript, JQuery, and other web programming techniques.
- Work with website managers and brand leadership to improve the performance of the websites and add new features as necessary.
- Perform testing procedures on bug fixes or new enhancements into the hi5 platform.
- Provide technical and programming support for integration between the websites and third party providers.
- Estimate workload and time estimates on all projects. Coordinate with leaders in the company status of individual projects and timelines to completion.
- Provide technical assistance and recommendations on process improvement.
- Produce and maintain written documentation of system information.
- Stay abreast of changing trends as they apply to web best practices in programming and design.

QUALIFICATIONS:

- Bachelor's degree in Information services or technology related discipline *or* 2-4 years experience in business programming.
- Strong understanding of databases, SQL Server and software development skills required.
- Experience with web environments is critical, with an emphasis on client-side and server-side Java technologies, HTML, CSS, Javascript, and JQuery.
- Strong understanding of fundamentals of other areas of business such as accounting, marketing, and distribution.
- Ability to interact with staff, at all levels, in a fast paced environment, sometimes under pressure, remaining flexible, proactive, resourceful and efficient, with a high level of professionalism.
- Ability to prioritize and demonstrate an ability to change priorities when the situation requires.
- Very strong attention to detail.

At Baudville Inc, also known as *The Office of Positive Mojo*, we offer a challenging but rewarding work environment where employees respect and recognize each other. We are an equal opportunity employer dedicated to workforce diversity and a drug- and smoke-free workplace. Drug screening and background check are required.
